

Color touch display 4.3" for panel mount

Freely configurable widgets

Add pages as required

Modbus

Panel Mount

Non-Volatile memory

Applications

- HMI in Plantroom, panels and machine rooms
- Optional touch for adjusting user values such as Setpoint

Features

- High resolution TFT Color display with optional touch
- Display Modbus variables on widgets in either text or graphic format
- Write widget values via Modbus
- Models have different numbers of pages and widgets
- Backlight On/Off configurable on Modbus with auto timer
- Optional password on touch widgets
- Auto page flip to bring users attention to information

Display

4.3" 800x480 pixel high contrast capacitive touch screen with back light. The wake and sleep timer are configurable on Modbus. Touch widgets are available on -T models to provide control of Modbus values.

Operation

Set the personality using edgeUP Composer GUI editor and download using edgeUP desktop application. The personality files determine everything from the number of pages (multipage models), widgets, widget alignment, widget to Modbus register association and many more unbelievable features. A truly amazing product that will change the way we visualize data from control systems.

Configurable and interactive with a response time that makes the user experience great.

Specifications

Display	4.3" 800x480 capacitive touch screen
Communication	Modbus Slave [addr1/9600/8/n/1] Configurable up to 56k
Power Supply	8-36V DC 4W
Clock	Only on -C models. 7 Day battery backed lithium.CR927 (Not included)
Working Temp	0°C ~60°C, 0~85%RH (Non-condensing)
Storage Temp	-10°C ~80°C
Housing	Plastic Black.
Dimensions	79h x 117w x 18d (mm)
Cutout	74.5h x 111.5w
Protection	IP30
Weight	400g
Warranty	12 months. Limited to replacement of product

Termination and wiring

Screw terminal block for DC power and RS485.

GUI design

Use edgeUP configuration tool as a complete design and download tool or edgeUP Composer for drag and drop design with edgeUP for file transfer. Refer to [eZi-COM-DSP-UserManual.pdf](#) for a list of widgets. All resources available on eZiControl [Knowledge](#) website.
